

# LED LINEAR LIGHT

Linear lights have designed with a simple but beautiful appearance, using aluminum alloy as housing material, die-cast aluminum end covers with no visible screws. The external dimension is scientific and reasonable, high transmittance diffuser creates high visual comfort and uniform lighting distribution, anti-glare effect is excellent, the diffuser and the housing matched perfectly. The advanced thermal management technology to ensure the LED lifespan, consistency of CCT when maximized output lumens. Adopt anti-glare diffuser and twice reflection light transmittance principle. Multi installation methods for your option(ceiling, recessed, buried, track, pendant and wall mounted), installation methods are easy and flexible, apply to various applications with different angles adjust.

### Parameters

Beam Angle:: PC 110°, LENS: 24°/60°/oval 25°60°/Deflection Wallwash /Grazing Wallwash/ Downward Wallwash/Up+Down

Input:220-240V, Power: see rating label on product and box

CCT:3000/4000/6000k CRI:Ra>80(90 optional)

Driver: Tridonic/Osram IP Class: IP20 Lifespan:50000hrs

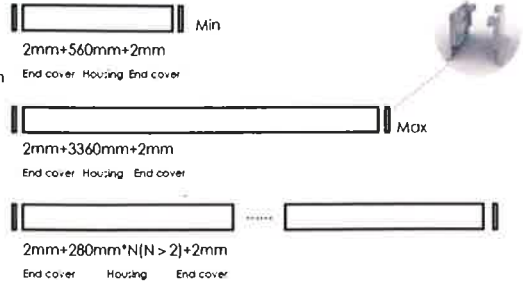

Warranty: 5 yrs Housing Color: White/Black/Silver

Fixture Length: see model on rating label.

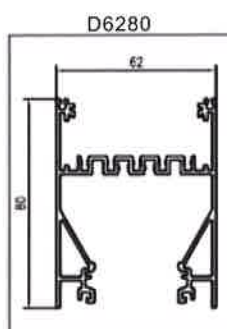

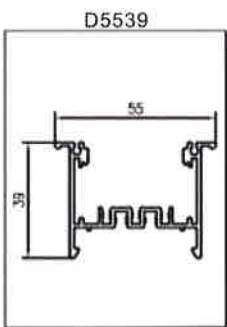

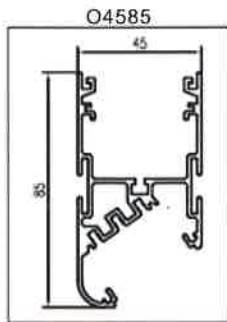

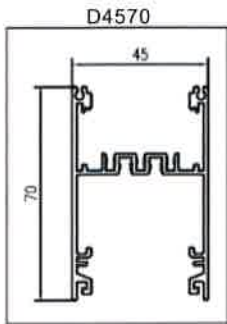

560mm/840mm/1120mm/1400mm/1680mm/1960mm/2240mm/2520mm/2800mm/3060mm/3360mm

### Modular Combination

Conform to ZHAGA standard length 280mm, 560mm, 1120mm for combination, come to seamless connection of each light without separate the housing

### Dimensions

### Optical Beam Angle

Symmetric light distribution				
	PC 110°		PC up and down	
Symmetric light distribution				
	24°		60°	
Asymmetric light distribution				
	oval flood 25°60°		downward wallwash	
Asymmetric light distribution				
	deflection wallwash		grazing wallwash 10~15cm installation distance to wall
